

AUTOHAUS

CALL FOR TENDERS N° AHDG/AO/004/2022/11/09 OF 09 NOVEMBER 2022 FOR THE SELECTION OF A SUPPLIER OF A DIDACTIC SYSTEM FOR ENGINE MANAGEMENT AND A DIDACTIC SYSTEM FOR AUTOMOTIVE ELECTRONICS.

CONTEXT:

Autohaus Volkswagen Cameroon is Volkswagen's exclusive representative in Cameroon, based in Douala. It is one of the leading companies in the automotive sector in Cameroon. The company offers the general public the following products and services: sale of Volkswagen brand vehicles to individuals and companies, sale of used vehicles, maintenance and repair of Volkswagen Group vehicles and multi-brand vehicles, sale of spare parts and various training courses.

Autohaus Volkswagen Cameroon considers the lack of skills of locally trained auto mechanics in mechatronics as well as the maintenance and repair of modern vehicles with electronic control components as a major challenge. In a context where the number of modern vehicles equipped with assistance systems and electronic components continues to grow in the local market, the lack of skilled workers makes it not only more difficult to expand the future, but even to continue the company's business activities. The expected increase in electric mobility will create new challenges and additional demand.

In order to counter the shortage of skilled labor and further qualify its own employees, Autohaus Volkswagen Cameroon offers in its training center approved by MINEFOP CFP ASTA a one-year practical training in automotive mechatronics with a particular focus on modern electronic systems for analyzing vehicle breakdowns and troubleshooting vehicle electronic components.

For practical training within this CFP in automotive mechatronics, Autohaus Volkswagen Cameroon needs to buy two didactic benches, a bench for engine management and a bench for automotive electronics and CAN.

Autohaus Volkswagen Cameroon invites qualified companies to submit a quote for a didactic bench for **engine management and a didactic bench for automotive electronics and ADC** in accordance with the specifications and other requirements listed in the attached file **20220511_Call Tool Offers didactic system**.

This invitation to tender is also available on the website: <https://autohaus-cameroon.com/fr/>

CLIENT: AUTOHAUS S.A. – PROJECT develoPPP
